Subject: Re: Neptune, Pavillion, & ADQs

Las Vegas data has been placed on the L: drive.

As requested Steve, I modified the summary spreadsheet: v1 is on the L: drive. The changes in v1 include:

- 1) R flags added to some of the ethoxylate compounds.
- 2) Changes of U flags on the ALS, Las Vegas, R3, and TestAmerica tabs.
- 3) Addition of some notes describing R flags on the Ethoxylate tab and the low MW acids tab.

Thanks,
Rick

Dave-

All data packages but LV data has been sent to Neptune. They are working all weekend. They will send me draft reports as they complete analytical suites. I have received a draft report on several analytical suites which I have been trying to review, hope to do today. We (QA) have to review these reports before we can forward to Rick. I noticed this morning the LV data package is on the Las Vega drive. I tried but I cannot copy it to our L drive Pavillion folder.

Rick-

Here is the path to the Las Vega folder: \\Aa.ad.epa.gov\\ord\\LAS\\Data\\Priv\\NRP_RD

Can you send me your updated spreadsheet to show what exactly has been rejected in the Las Vegas data so I can share with Dave the auditor? There is no point in doing an ADQ on rejected data.

I will email the LV data package this morning in increments so it will go through and not get hung up.

Thanks,

sv

Subject: Neptune, Pavillion, & ADQs

Can anyone confirm for me that all Pavillion data packages have gone to Neptune? And that Neptune is working to turn ADQs around ASAP (48-hrs?)?
